

Pure +
Steel

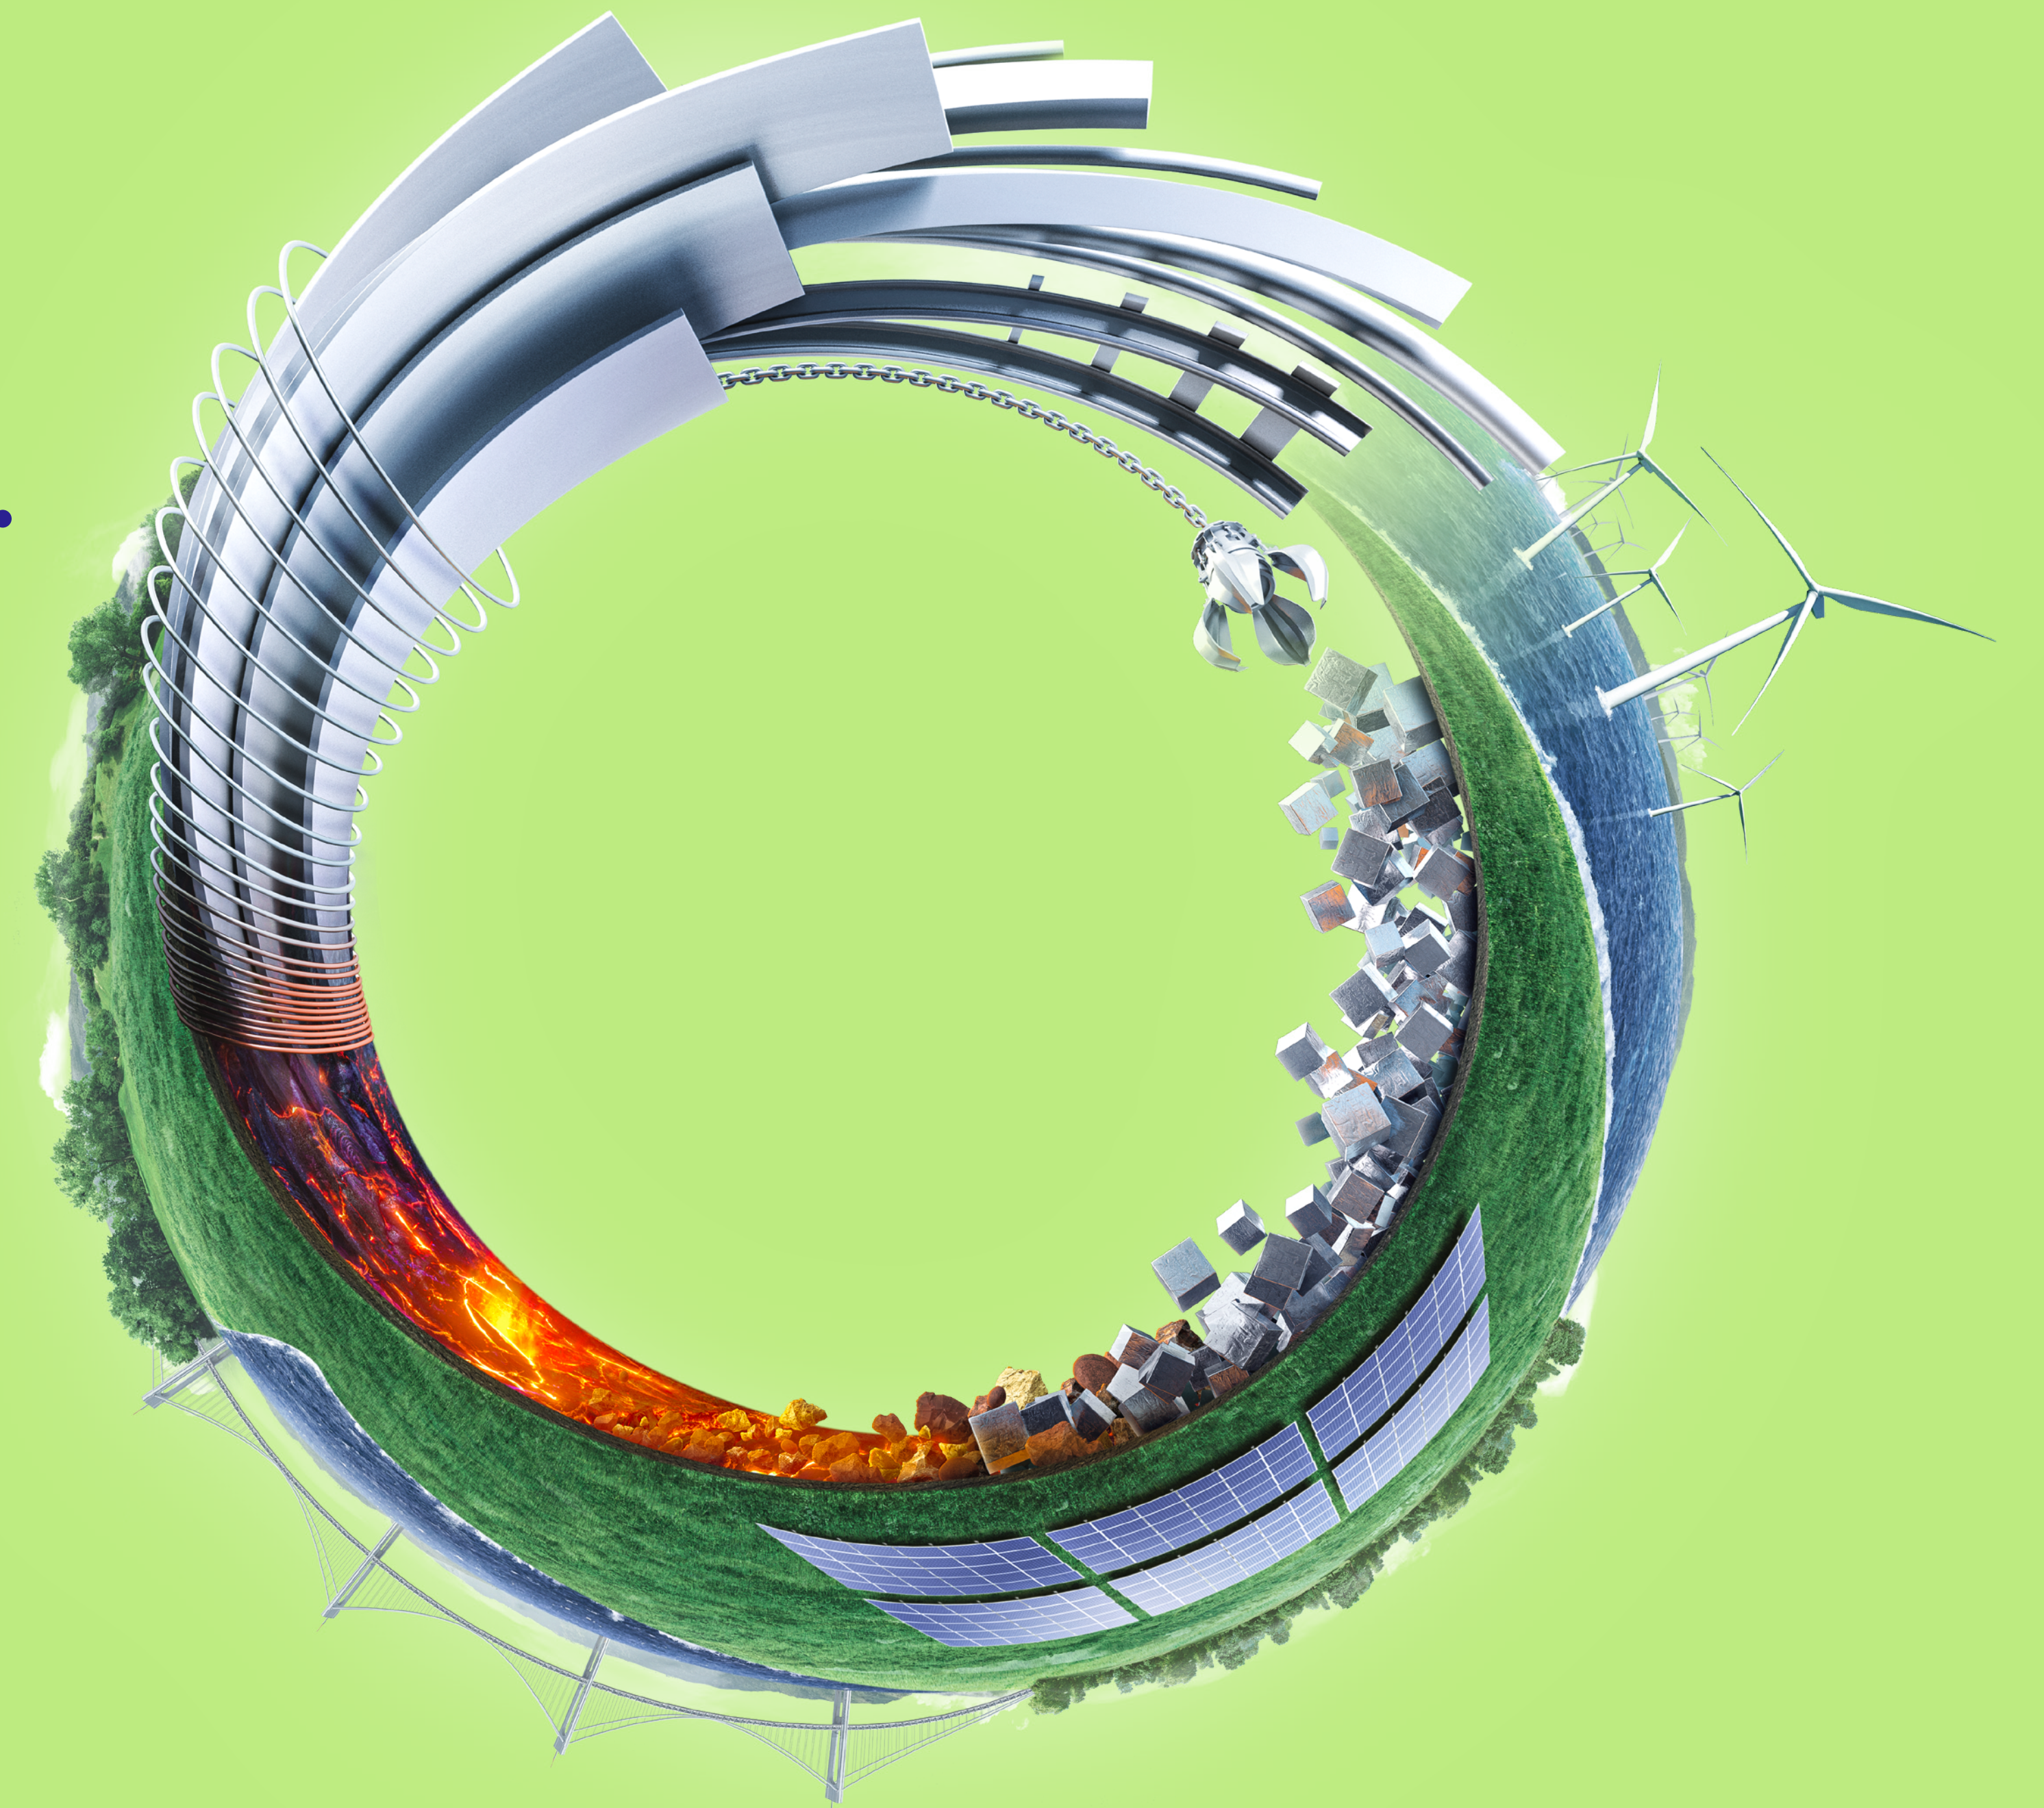

Together we are strong With Pure Steel+

Pure Steel+ is the brand from Saarland's steel industry. The shared umbrella brand from experienced premium steel manufacturers Saarstahl and Dillinger. Our quality steel can be found in cars, railroad tracks, wind turbines and solar parks all over the world. It is also used in the aerospace industry and in the most innovative buildings from New York to Shanghai. Wherever quality truly counts. And in a wide variety of everyday objects, like paper clips, pens and shopping carts.

For progress, climate, generations: **Pure Steel+**

Pure innovation. We invest in state-of-the-art equipment and know-how and are constantly developing new, innovative solutions. This includes our spring steel, which cuts weight by up to 20 percent in vehicle construction. **Pure quality. Pure commitment.** We have been spending 10 percent of our investments on environmental and climate protection for years. Now we want to become carbon-neutral. **Pure future.** Our products are accelerating the energy and mobility transition, in things such as solar power plants, railroad tracks, and electric cars.

Future made by us. With Pure Steel+

With our decarbonization project Power4Steel, we are focusing on the use of hydrogen, on electric steel production, and on recycling steel scrap. A direct reduction plant (DRI) and one electric arc furnace (EAF) each are now slated for construction in Dillingen and Völklingen, which will enable the majority of our production to be carbon-reduced from 2030 on. A third EAF is to be built in a second phase by 2045 – for an annual total of 4.9 million tons of carbon-reduced crude steel. We are investing around EUR 3.5 billion in this and are receiving funding from the state, the federal government, and the EU.

Engine for innovation and top quality With Pure Steel+

We at Saarstahl have been driving innovation for centuries with the excellent quality of our special steels. From “green” railway tracks to high-performance steels for e-mobility. In aerospace, mechanical engineering, bridges, manufacturing plants, and in numerous everyday products. Our solutions create a future for generations to come. Paving the way for a climate-neutral tomorrow.

The logo for Pure+ Steel features the word "Pure" in a blue sans-serif font, followed by a plus sign. Below "Pure" is the word "Steel" in a larger, bold, blue sans-serif font. A horizontal line is positioned above "Pure", and a vertical line descends from its right end, meeting the top of the plus sign.

- **We are making big changes.**
At our locations and for the world.
- **We are excited about what we do.**
With strong commitment and innovative spirit.
- **We are transforming.**
The energy and mobility transition is succeeding with our steel products.

Future made by us.
